

APPLIED ENVIRONMENTAL TECHNOLOGIES, INC.

Date: 04/03/2001

Sheet 1 of 1 **MW-7**

Job#: 0693-01A Location: 2520 Temple Street, Los Angeles

Drilling Company: APEX

Client: Sandra Sholkoff

Drilling Crew: Gerry, Shannon, and Nathan

Geologist: Lorian I. Sanders

Drilling Method: Hollow Stem Auger

Time Start/Finish: 07:15/09:10

Sampling Method: CA Split Spoon

Water Levels/Time/Date: 10.0'/07:45/4-3-01

Surface Conditions: Asphalt

Construction Details: 2" PVC 5' Blank, 20' Screen (0.02" Slots)

Depth In Feet	Sample Depth	Moisture Content	OVM ppm*	USCS Code	DESCRIPTION
0				----	Asphalt (~2" thick).
1					Hand auger to 5.0'.
2					
3		dry		SP	SAND (SP), light brownish-gray, dry, fine and medium grained, moderately graded, mild to
4					moderate odor. (Sample collected with hand auger - no blow count.
5	5.0'		2,658		Soft (1/1/2), color change to light gray at 5.0'.
6	(07:40)				
7					
8					
9					
10	10.0'	damp	1,257	CL	CLAY (CL), olive-gray, very stiff (6/8/15), damp, moderate odor (native clay).
11	(07:50)				
12					
13					
14					
15	15.0'	damp/wet	92		CLAY (CL), olive-gray, very stiff to hard (6/8/20), damp to wet, some silty sandy clay
16	(08:00)				layers ~1" thick interbedded.
17					
18					
19					
20	20.0'	damp/wet	256		CLAY (CL), medium brown, very stiff to hard (11/17/25), damp to wet, some fine and
21	(08:10)				medium grained sand layers interbedded, mild odor.
22					
23					
24					
25	25.0'	damp/wet	18.5		CLAY (CL), medium brown, hard (15/29/35), damp to wet (damp soils, wet liners), some
26	(08:20)				silty clay.
27					
28					Boring terminated at 25.0'.
29
